

# HERMetric Sampler GT

Portable gas tight sampler  
with liquid transfer

- For connection on 2" HERMetric Compact Valves
- No gas release during sampling
- Representative sample
- For low or high viscous liquids
- Adapters for foreign valves available

# HERMetric Sampler GT

Portable gas tight sampling  
with liquid transfer

The HERMetric Sampler GT is designed for closed sampling of liquids which present a Fire-, Health- or Air pollution Hazard. Its gas tight construction avoids a pressure release from the tank and exposure to fumes during operation. The transfer of the liquid from the sampling bottle to the laboratory bottle occurs by gravity in contact with the atmosphere.

- **Easy installation on 2" vapour control valves with a quick connect coupling.**
- **The sampling height can be measured on the graduated tape.**
- **After sampling, the liquid can be transferred into a laboratory bottle.**
- **The sampler is delivered with a zone sampling bottle as a standard. Additional spot, bottom or running sampling bottles are available.**

## Technical specifications:

Maximal tank overpressure:	0.3 bar, 4.4 psi
Unit height:	1016 mm
Weight:	8.8 kg
Tape length:	30 m, 100 ft
Capacity of sampling bottles:	~ 0.5 l

## A sampler dedicated to your application:

### ➤ HERMetric Sampler GT

With FKM (Viton) gaskets for the main applications in hydrocarbons

Materials: Stainless Steel AISI 316, PTFE, PVDF, FKM (Viton)

### ➤ HERMetric Sampler GT Chem

With FFKM gaskets, recommended for operations in corrosive liquids

Materials: Stainless Steel AISI 316, PTFE, PVDF, FFKM

« A closed system exists when a marine tank vessel does not permit the direct exposure and/or release of the tank contents into the atmosphere under normal operating conditions.» (API MPMS 17.2 A.4.1)

- For connection on 2" HERMetric Compact Valves
- No gas release during operation
- For low or high viscous products
- Representative sample

## Principle of installation

on 2" vapour control valve.

We help you to protect  
the operator and the environment.
